HARSHITH NETHA GUNDETI

Industrial Engineer | Process Improvement, Quality & Manufacturing Analytics

Springfield, MA | (413) 288-0548 | harshithnetha02@gmail.com | linkedin.com/in/harshith-g-b08a9a263

PROFESSIONAL SUMMARY

Industrial engineer holding a Bachelor of Technology in Mechanical Engineering and a Master of Science in Industrial Engineering, with manufacturing experience in root cause analysis, process improvement, and data-driven decision making. Reduced product rejection rates by 8% by defining critical process parameters and implementing corrective actions on a production line. Six Sigma Green Belt who plans and organizes projects using WBS and EVM, and applies statistical tools including SPC, Cp/Cpk, and DOE to improve manufacturing quality and efficiency.

SKILLS

Process Improvement & Quality: Root Cause Analysis, CAPA, Six Sigma (DMAIC), Lean Manufacturing, Kaizen, 5S, Line Balancing, SPC, Cp/Cpk

Data Analysis & Reporting: Minitab, Design of Experiments (DOE), ANOVA, Excel (XLOOKUP, pivot tables, SUMIFS), Power BI, KPI Reporting

Project & Operations Management: Project Management (WBS, EVM), Time Studies, Supply Chain Management

Engineering & Design: CAD (SolidWorks, AutoCAD), Engineering Drawings, Prototyping

Certifications (LinkedIn Learning & other platforms): Six Sigma Green Belt, OSHA General Industry Training, Project Management Foundations, Excel Essential Training

PROFESSIONAL EXPERIENCE

Process & Quality Intern — Sep 2022 – Jul 2023

Steller Plastics Pvt. Ltd. — Chennai, India

- Served as daily point of contact between quality and production, resolving issues through CAPA.
- Coordinated with process engineers to define critical process parameters, cutting the rejection rate by 8%.
- Applied lean principles (Kaizen, 5S) to streamline shop-floor workflows and reduce waste.
- Maintained SPC control charts and Cp/Cpk studies in Minitab to monitor performance and catch variation early.
- Wrote and maintained SOPs and technical documentation to standardize work across shifts.

Student Intern – Product Design — May 2019 – Jul 2019

BOLT IoT Pvt. Ltd. — Hyderabad, India

- Designed mechanical components for IoT devices in SolidWorks and AutoCAD, producing drawings for prototypes.
- Built and tested prototypes, analyzing performance and proposing design changes.
- Coordinated with external vendors, comparing cost, quality, and lead time.

ACADEMIC PROJECTS

Line Balancing & Time Study — Work Analysis & Design (course project)

- Collected time-study data on a Lego-car assembly line and identified the correct build sequence across stations.
- Identified the bottleneck station and calculated slack time at other stations to balance the line.

Design of Experiments for Battery Production Optimization — Process Analyst

- Collected experimental data across a full factorial DOE in Minitab (temperature, charge time, material type).
- Used ANOVA to analyze the data and identify which parameters most improved charge retention.

EDUCATION

M.S., Industrial Engineering — Aug 2023 – May 2025

Western New England University — Springfield, MA

Coursework: Work Analysis & Design, Statistical Process Control, Production & Inventory Modeling

B.Tech, Mechanical Engineering — Aug 2017 – Jul 2021

Vignana Bharathi Institute of Technology — Hyderabad, India
